

Weatherly Area School District

eSchoolBook (Online Grading System)

Dear Parent(s) of

Weatherly Area School District is proud to announce that students and parents have access to our online grading system (eSchoolBook). eSchoolBook gives parents and students the ability to view grades online. The system allows you to keep track of your child's grades as frequently as you like. (Note: Grade accuracy will be determined by how frequently the teacher inputs grades. Please contact the teacher through the school districts website on the staff directory page.) If you have questions about login information, grades, or general usage of the program please call the school and we will provide you with the answers you need.
